## WORK EXPERIENCE

### Frontend developer, Codeus, Podgorica, Montenegro

February 2021 - now

#### Highlights in Codeus

- Started as a frontend engineer at Codeus in 2021, highlighting Vue, Tailwind, and Firebase expertise.
- Quickly adapted to Vue, transitioning from Angular background.
- Thrived in supportive environment with strong work ethic at Codeus.
- Engaged in continuous team development, enhancing experience in evolving software industry.

#### Projects I worked on in Codeus:

*Health Data Platform for a U.S. Healthcare Company, Jan 2023 - Present:*

- Frontend developer at leading US healthcare tech firm.
- Enhanced healthcare data management platform.
- Managed portals, improved accessibility, proposed solutions.
- Technologies: Vue.js, Typescript, Vuetify, HTML, CSS, Git, Linux, Jira.

*Allegra POS Software, Feb 2021 - Jan 2023:*

- Developed Vue.js-based POS software.
- Enhanced user experience, provided support.
- Implemented admin portal, internationalization.
- Technologies: Vue.js, Typescript, HTML, CSS, Git, i18n.

### Fullstack developer, Galilej, Belgrade, Serbia

October 2019 - February 2021

#### Highlights in Galilej

- Referred for remote work at Galis by a Comtrade colleague, focusing on musical school software.
- Contributed to projects customizing musical instrument and note rental solutions for Serbia's industry.

#### The project I worked on in Galilej:

*Medijateka - Nototeka Apr 2018 - Oct 2018*

- Led full-stack development using Angular 6 and Firebase authentication.
- Improved user experience and security through Firebase integration.
- Managed app deployment with GitHub Actions for automated updates.
- Technologies: Angular 8, Typescript, Angular Material, HTML, CSS, Git, Linux, Asp.Net Core 2.1.

### Backend engineer Comtrade, Belgrade, Serbia

Oct 2019 - May 2020

#### Highlights in Comtrade

- Joined project post-winning team challenge at Comtrade.
- Learned ASP.NET Core.
- Developed multi-company app with authentication features.

#### The project I worked on in Comtrade:

*College Dorm Application Oct 2019 - Feb 2021*

- Led backend development for a college dorm application in ASP.NET Core.
- Managed database operations, conducted testing, and implemented user authentication.
- Presented final product to clients and supported Vue 2 frontend team.

## PERSONAL PROJECTS

For a comprehensive view of my skills and projects, please visit my portfolio at <https://portfolio-app-2b6e1.web.app/>

- Built an Angular/Firebase app for local COVID-19 stats and automated data extraction from ijcgc.me using Puppeteer and a YML script.
- Worked with local volunteers to build an app for uploading and displaying trash data on an interactive map. Developed Vue 3 frontend, utilized Firebase for backend services, and integrated Leaflet for map functionality.
- Created a personal portfolio using Vue 3 and Vuetify to showcase technical skills. Integrated achievements like a blog for film reflections. Hosted on Firebase for security and reliability.
